

ELECTRONIC SMOG BUSTERS:

**CRYSTAL CATALYST BEAD
CRYSTAL CATALYST TOROID**

**CRYSTAL CATALYST TAB
TRI PAK**

These above little "gizmos" have proven to be wonderful in neutralizing environmental radiation. I have been using them on my TV's, refrigerator, computer screens and any electrical devices to clear ELF and other noxious frequencies. I am able with these "helpers" to work at my computers for long periods of time without being "fried". Hilarion referred me to these super-conductive devices and I have been extremely pleased with them and offer them to you. A very low cost solution to a difficult problem. Catalyst beads, tabs, and toroids have a unique composition and structure which allows them to absorb and then rebroadcast harmful electromagnetic radiations in a cleaner form. They are dielectric resonators made from space age materials. Their molecular structure resonates to alter the frequencies of most harmful environmental radiations, causing the damaging effects to be neutralized. These products are neither electrical nor magnetic, but work with a different energy which does not harm electronic equipment or discs. Beads, tabs, and toroids are designed to neutralize annoying radiation levels from word processors, computer and T.V. screens, florescent lights, telephone receivers, automobile electronics, powerline transformers, and most electronic devices. Their effectiveness can be measured chemically, photographically, with biofeedback, and muscle testing. Commuters who wear a bead report increased alertness and reduced jet lag. Call or write for additional information.

G-33

Our finest computer, T.V. and car resonator, combining years of research to make your equipment user friendly. Hi-tech in appearance, more powerful, for those who want our best. Does not remove magnetic or electrical fields. It alters their nature. Attach the G-33 to your equipment, and wear **one** Crystal Catalyst® Bead.
